

Twist, pull and whizz! The so called iynx!

Make an ancient greek toy with a special sound

STEPS

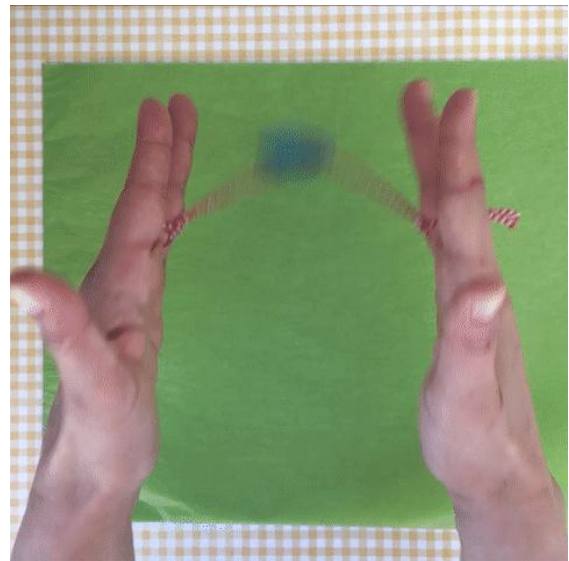

1. Collect your materials: your button and thick string. Use as big a button as possible for a better result!

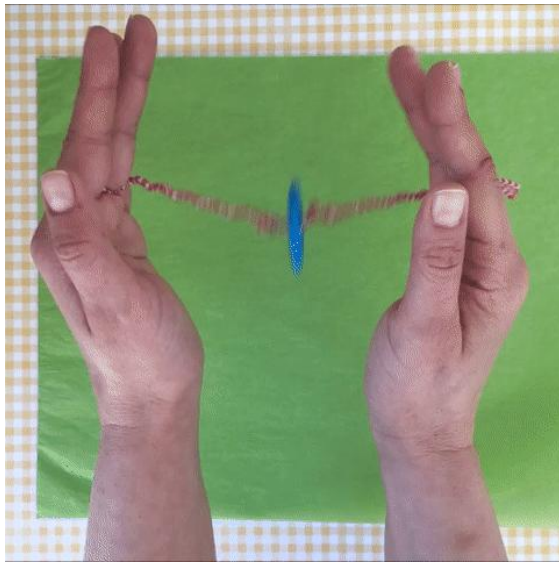

2. Pass the string through two of the button holes.

3. Take the two loose ends of the string and tie a knot. Your iynx is ready.

4. Time to play! Twist the string as tightly as you can.

5. Alternate between stretching and relaxing the tension of the string with your hands, and hear the strange sound of the iynx!

6. You can also use clay to make your iynx like the ancients. In that case you will need a tool of some kind, such straws to make the two holes for the string.

7. How about painting with colors or design according to your personal taste your clay iynx?
